PROFESSIONAL SUMMARY

Senior SDET and QA Automation professional with 10+ years of experience improving software quality and release confidence. Experienced in risk-based test strategy, scalable UI and API automation, CI/CD, test observability, root-cause analysis, and QA team leadership. Applies generative AI, LLMs, and agent workflows to test generation, failure analysis, intelligent triage, and technical documentation. Combines hands-on engineering with stakeholder communication and delivery-focused quality practices.

CORE COMPETENCIES

Quality Engineering: SDET, QA Automation, Quality Assurance, Risk-Based Testing, Test Strategy, Release Confidence, Test Observability, Root-Cause Analysis, Flaky Test Reduction, KPI Reporting, Performance Testing

Test Automation: Selenium, Selenium WebDriver, Playwright, Cypress, Appium, Robot Framework, Cucumber, Gherkin, BDD, JUnit, JMeter, XPath, CSS Selectors, RPA

Programming & APIs: Java, Python, JavaScript, SQL, REST APIs, REST Assured, Postman, SoapUI, Spring Boot, Spring MVC, Hibernate

Cloud, Data & Security: Google Cloud, Vertex AI, Gemini, BigQuery, Cloud Run, Cloud Build, Firestore, Cloud Vision, AWS, AWS Lambda, Machine Learning, MongoDB, MySQL, Cybersecurity, Cloud Security

CI/CD & Delivery: Jenkins, Git, GitHub Actions, Maven, Docker, Kubernetes, Azure DevOps, CI/CD, Agile, Scrum, Kanban

PROFESSIONAL EXPERIENCE

QA Automation Tester Team Lead
Jan 2023 – Present

Capgemini Engineering | Banking project

- Lead QA automation activities for a major Spanish banking project using Selenium, Robot Framework, Cucumber, Java, Maven, and Jenkins.
- Coordinate the team, contribute to CI/CD delivery, track client KPIs, and communicate actively with stakeholders in an Agile environment.
- Consistently exceeded the annual quality KPIs agreed with the client, as documented in the profile.

Project Director
Jan 2026 – Oct 2026

Kiterinha Macapá | Remote

- Led the technical delivery of a hotel project, gathering functional and technical requirements directly from the client.
- Designed and implemented test infrastructure and automated test code to support project quality.

Software Quality Assurance Lead
Jan 2018 – Dec 2022

Dinamita Creativa

- Planned, budgeted, and supported delivery of digital products across sectors.
- Owned automated testing and CI/CD activities and later managed client communications and requirements.

Project Director
Jan 2021 – Dec 2021

Asociación Argentina de Contribuyentes | Remote

- Led technical decisions, security and testing, functional and technical requirements, and team coordination.

University Lecturer
Apr 2018 – Nov 2022

Universidad Abierta Interamericana (UAI)

- Designed and delivered financial analysis courses at the institution's request.

EDUCATION & PROFESSIONAL TRAINING

IT Technician (Técnico Informático) — Colegio Salesiano San José.

IFCT0109 Certificate of Professionalism in Information Security, Level 3 — Spanish Ministry of Education; 500 hours, 2025. Training includes security, auditing, and incident management.

CERTIFICATIONS

AWS Certified Machine Learning Engineer – Associate (MLA-C01) – 2026.

AWS Certified AI Practitioner – 2026.

Google Cloud Generative AI Leader – 2025; profile lists validity through November 2028.

Google Cybersecurity – 2026.

MongoDB SI Associate Certification – 2024.

Emerging Leaders – Harvard Business Publishing, 2024.

SELECTED GOOGLE CLOUD BADGES & PROFESSIONAL DEVELOPMENT

40+ Google Cloud badges are listed in the profile. Selected verified credentials include:

- Gemini Enterprise Deployment and Agent Development; Add Agents to Gemini Enterprise; Govern Agent Access; Workspace Data Sources and Model Armor.
- Agent Development Kit (ADK): Evaluate and Improve Agents; Deploy an Agent; production-grade agent development, operation, and security.
- Generative AI Leader; Gemini CLI; Gen AI: Beyond the Chatbot; multimodal reasoning with Gemini; text prompt engineering.
- Vertex AI Search and Conversation integrations for voice and chat; enterprise search and conversation applications; Gemini Enterprise Assistant capabilities.
- AI Applications: search and recommendations, media search, result optimization, and GenAI model and agent evaluation.
- Conversational Agents: playbooks, flows, data stores, webhooks, tools, Messenger integration, and Agent Assist.
- Cloud security and infrastructure: Security Command Center, Threat Intelligence, SecOps on GDC, Cloud Security Fundamentals, load balancing, and reliable infrastructure.
- Additional training: Advanced Topics in Artificial Intelligence (University of Illinois Urbana-Champaign); End-to-End Test Automation with Playwright (Udemy); Introduction to DevOps (IBM); Project Management (University of California, Irvine).
